JCI The Journal of Clinical Investigation

Sensitization of TRPA1 by PAR2 contributes to the sensation of inflammatory pain

Yi Dai, … , Hiroki Yamanaka, Koichi Noguchi

J Clin Invest. 2007;117(10):3140-3140. https://doi.org/10.1172/JCI30951C1.

Corrigendum **Neuroscience**

Original citation: J. Clin. Invest.117:1979-1987 (2007). doi:10.1172/JCI30951. Citation for this corrigendum: J. Clin. Invest.117:3140 (2007). doi:10.1172/JCI30951C1. During the preparation of the manuscript, the doses of ET-18-OCH3, U73122, and GF were incorrectly reported in the legend for Figure 3. The correct sentence appears below. In some experiments, the bath solution was perfused with either a PLC inhibitor - ET-18-OCH3 (ET; 2 mM) or U73122 (2 mM) - or a PKC inhibitor, GF (0.5 mM or 10 mM) 120 seconds before SL-NH2 reapplication. The authors regret the error.

Corrigendum

Microbial translocation augments the function of adoptively transferred self/tumor-specific CD8$^+$ T cells via TLR4 signaling

During the preparation of the manuscript, two μ symbols were omitted from the data on page 2203. The correct text appears below.

Administration of rhIL-2 was performed by i.p. injection twice daily at 3.6–36 μg/dose for a total of 5 doses. Ultrapure LPS (1 μg i.v.; Invivogen) was administered 1 day after ACT.

The authors regret the error.

Corrigendum

Sensitization of TRPA1 by PAR2 contributes to the sensation of inflammatory pain
